Care Booklet of Shoes
Smooth Leather

Smooth leather shoe care

Step_1

Use a brush to get rid of dirt especially around shoelace and edge.

Step_2

Remove stains, dirt and old cream from the surface with the Leather Lotion.

- ※ Make sure to apply the lotion to a cloth rather than applying directly to the shoe.
- ※ First, test the lotion in an inconspicuous area.

Point

For applying shoe cream, use a rolled up cloth on fingers like this.

Step_3

Apply the shoe cream with a cloth.

Step_4

Brush after apply the cream that affects the cream to go around the entire shoe.

- ※ When you apply the cream with a brush, please match the colors between cream and brush.

Step_5

Polish the shoes with a shoe shine mitt after cream is dry. It works for not only giving the shoe shine, but also wiping off the extra shoe cream from the surface.

- ※ Recommend to change your shoelaces often. That makes a good impression of your shoes.

Step_6

Use waterproof spray as the final process. It protects against oil and water stains.

- ※ Spray thinly and entirely. Use the spray 20cm away from the shoes.

Boot Black
specially for your shoes

High shine finish

Polish at toe and heel.
Use the shoe polish to make shoes high-shine.

Step_1

Use a brush to get rid of dirt and then apply the Leather Lotion to remove stains and dirt.

※Make sure the surface of the leather toe and heel are clean before high-shine.

Step_2

Apply shoe cream thinly and entirely with a cloth. That is not only caring the shoes, but also preparing high-shine. Wipe the surface with a soft cloth after it has dried.

Step_3

Apply the shoe polish after put a drop of water on the toe or heel. Polish up gently like make a small circle. Put a drop of water again when you feel rough while polishing. Please try over and over until high-shine finishes.

How to care for rainy day

Apply the waterproof spray on the leather shoes.
That prevents the shoes from getting dirty and also protects against water and oil stains.

Step_1

Water removal is required if the shoes get wet.

※Please untie the shoelaces when you care the wet shoes.

Step_2

Put cloth or newspaper inside the shoes to absorb the excess water. When the shoes are getting dry, put Shoe Dry inside the shoes.

Step_3

Dry the shoes out of direct sunlight in a well-ventilated area. Provide shoe trees for keeping the shoes in shape during the drying time. Apply the shoe cream to keep the leather in good condition after they have dried.

What is "napped leather?"

Napped leather is the leather has been buffed.
There are three types of leathers called
"suede", "nubuck" and "velour".

Step_1

Brush to remove dirt and to beautify the suede.

Step_2

Use a rubber cleaner if the stain is difficult to remove and use the Suede Cleaner for general dirt.

Step_3

Use Suede Spray for complementary color when the shoes begin to fade. Use Suede Spray neutral color if the suede shoes are not black.

※Suede Spray neutral color keeps the leather in good condition and also works for preventing to fade.

The surface of suede leather will shorten. It is recommended to use Suede Brush for the surface at that time.

● Give a rest for shoes at least every other day.

Use shoe trees to keep the shoes in shape.

Care Booklet of Shoes

Cordovan

Cordovan shoe care

Cordovan leather is made from horse rump where is fibrous part.

This leather has the quality to last long and beautiful gloss.

Cordovan leather is used also for bags, wallets, belts and so on.

Specialized cream is necessary to keep the cordovan leather quality.

Step_1

Use a brush to get rid of dirt and then apply the Leather Lotion to remove stains and dirt.

Step_2

Apply the Cordovan Cream with a cloth.

Step_3

Polish the shoes with a shoe shine mitt after the cream has dried. It works for not only giving the shoe shine, but also wiping off the extra shoe cream.

Cordovan is a horse back leather made from the fibrous flat muscle. The surface of the cordovan is called lining leather that is actually the same manufacturing method as suede. Scraping the lining leather part makes beautiful gloss of the surface.
